

C-111 Spreader Canal

Project & Lands Committee

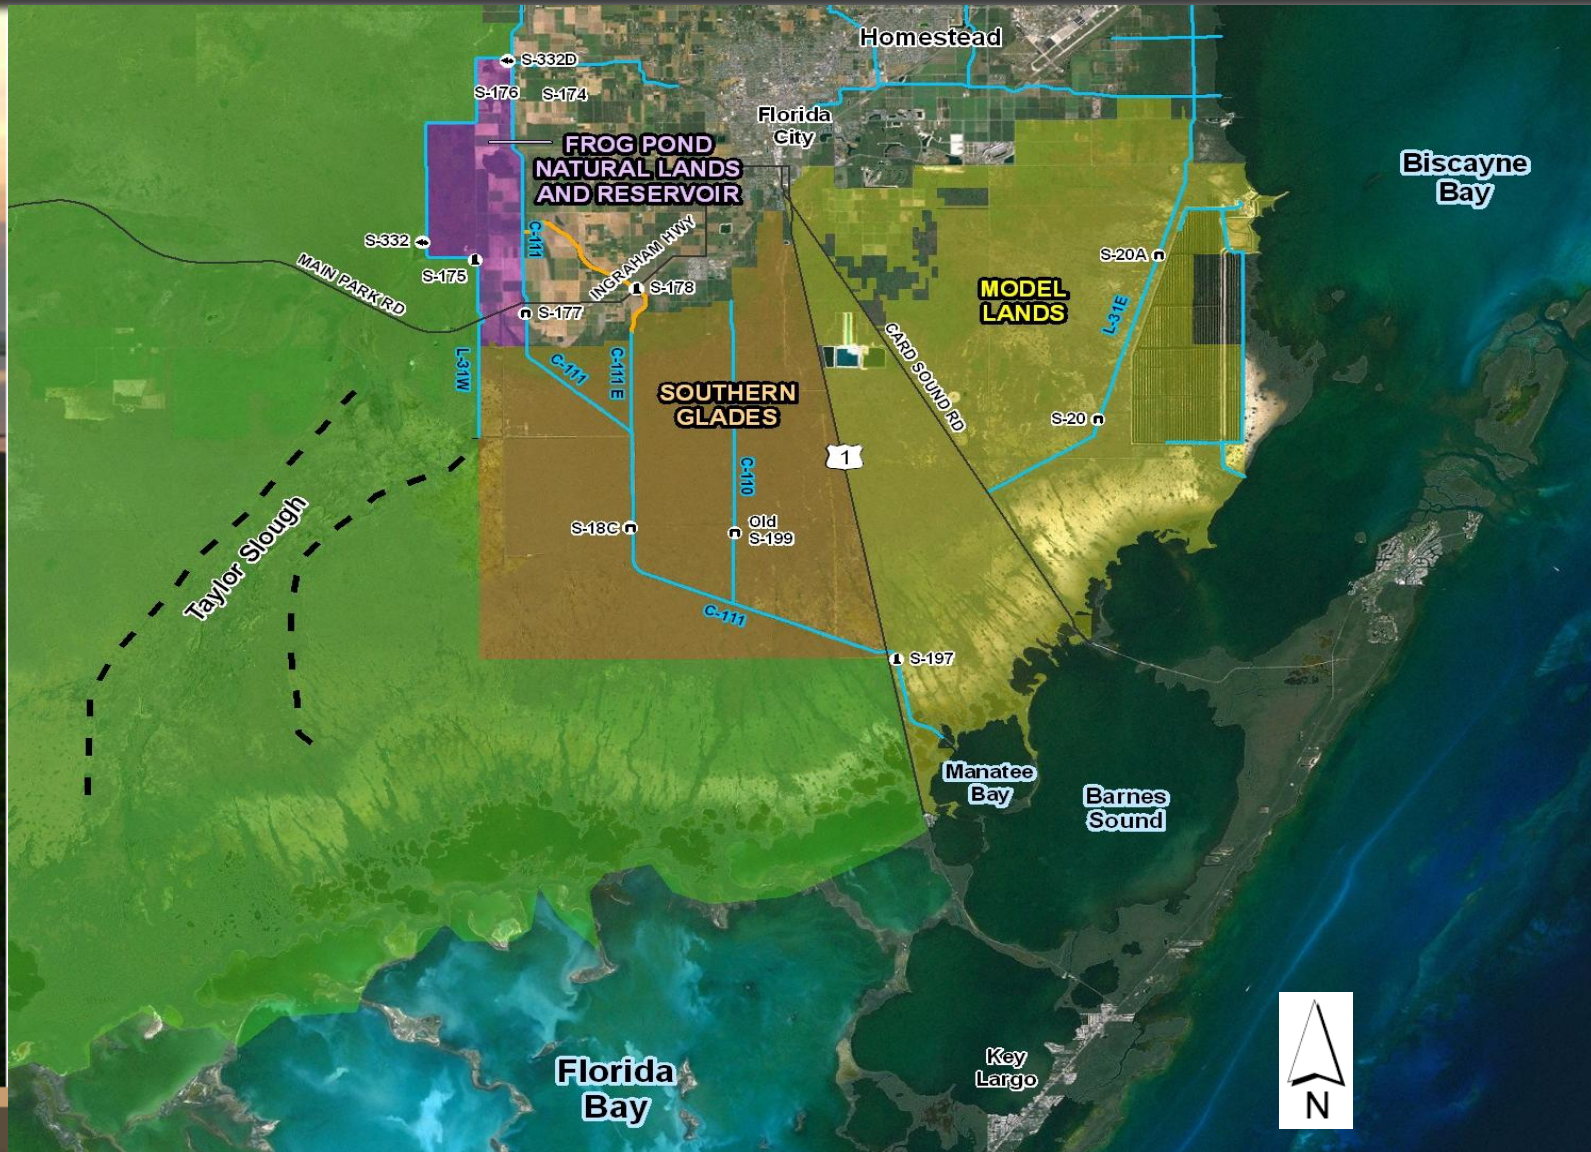

August 2009

John Dunnuck

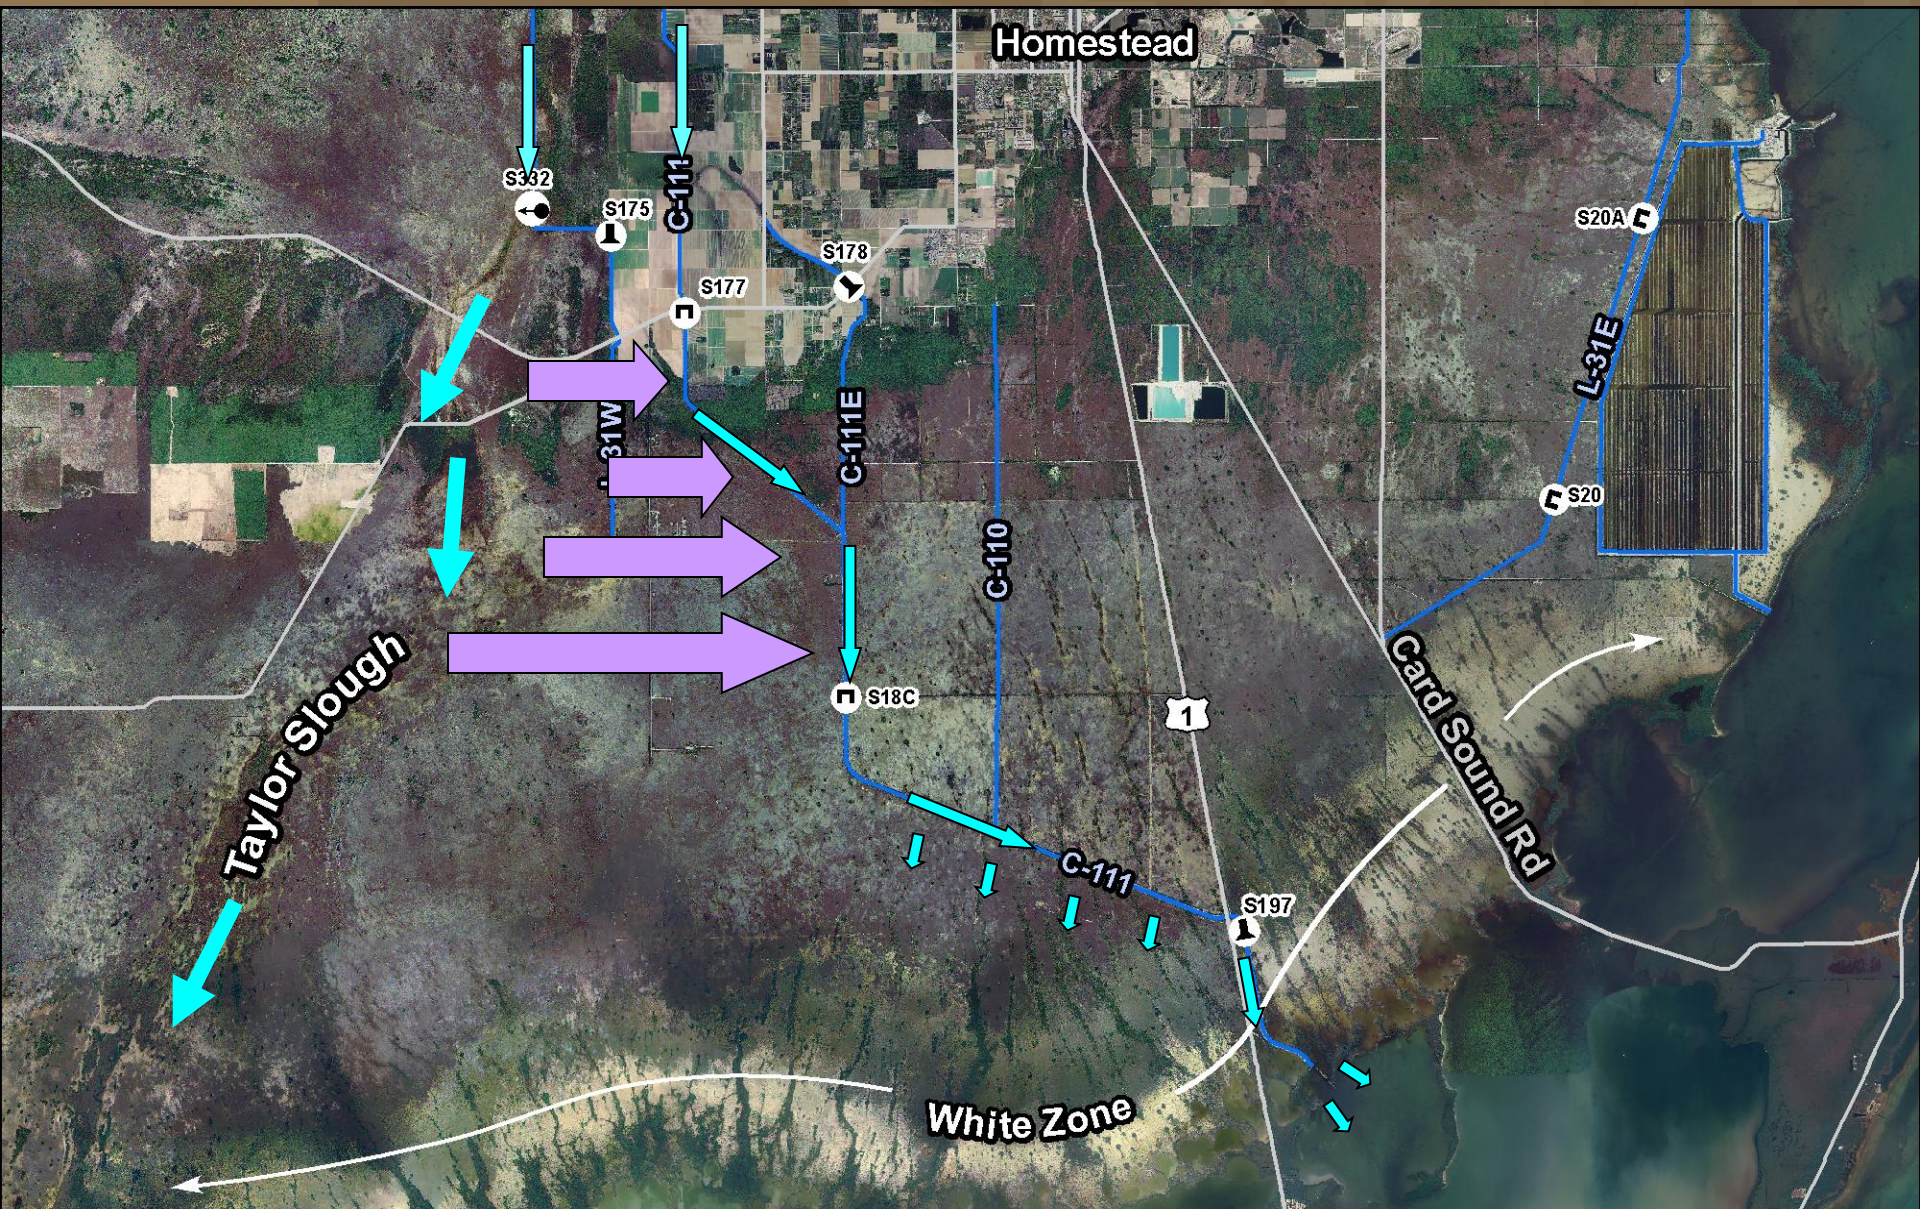

Project Objectives

- 
- Restore the quantity, timing and distribution of water delivered to Florida Bay via Taylor Slough
 - Improve hydroperiods and hydro-patterns in the Southern Glades and Model Lands
 - Return coastal salinities in western Florida Bay to levels as close as possible as to the pre-drainage model runs by restoring upstream water levels in eastern Everglades National Park

Project Vicinity

Existing System

C-111 Spreader Canal, Phase 1 Summary of Components

Public Meetings

- **Stakeholders Workshops # 1 – 2/5/08**
- **Dade County Farm Bureau – 2/26/08**
